

Dolfin

COCOA ACT 4

Our new sustainability program

Everyone has a role to play for the future of the planet, and Dolfin has decided to take a leading role by investing in a new ethical sustainability program: **Cocoa Act 4**.

WHY THE 'COCOA ACT 4' PROGRAM?

Because there are **four pillars** to this program that Dolfin wants to be both **clear and effective**.

1. HUMAN BEING

First, the human being is at the center of the brand's concerns, which is committed to improving the standard of living of cocoa bean producers, thanks to a **"quality" bonus** but also a **"chocolate" bonus** that will allow projects to be carried out within the Parc Community, located in Ivory Coast (access to water, school, dispensary, maternity, ...).

2. PRESERVATION OF THE PLANET

Dolphin also wants chocolate to rhyme with the preservation of the planet by practicing a **reasoned agriculture**, by ensuring the **training of cocoa producers**, by putting a **stop to deforestation**, by betting on **reforestation**, and by **reducing by 80% the use of plastic** in its packaging.

That's why you'll now find our chocolate bars in attractive cardboard sleeves. In addition, the transparent boxes that contain our chocolates are now made of recycled PET and 100% recyclable!

4. TRANSPARENCY

Finally, Dolphin wants to act in full transparency. **Traceability from the bean to the bar has become essential. The brand's commitments are clear, concrete and measurable.** They will be the subject of an annual report that can be consulted at any time on the brand's website and thanks to a QR code present on the products.

3. PRODUCT QUALITY

The third impacting element, and not the least, is the quality of the product.

At Dolphin, only the **highest quality ingredients of natural origin** are used. The fresh cocoa beans are rigorously selected and then fermented and dried in a Dolphin center in the Ivory Coast, for a chocolate with an exceptional taste.
